

# AgZyme<sup>®</sup> and Enhance

## Increase Walnut Yield by 773lbs at Agricultural Advisors Inc, in Live Oak, California

Ag Concepts Corp commissioned a study on the effect of AgZyme<sup>®</sup> and Enhance on Walnuts with John Post of Agricultural Advisors Inc, in Live Oak, California. 12.8 oz of AgZyme<sup>®</sup> and 1 gal of Enhance were applied early season, followed with another 1 gallon application of Enhance one month before harvest. Total yield in pounds per acre was examined. The application of AgZyme<sup>®</sup> and Enhance yielded a total of 4,901 lbs per acre. The untreated control yielded 4,128 lbs per acre. This is an increase of 773 lbs of per acre.
