

AgZyme[®] increases Corn Yield by 12.4 bu per acre at Miles Farm Supply in Owensboro, KY

Treatment	Yield
Check	214.2 Bu
AgZyme [®]	226.6 Bu

Summary: Yield increase of 12.4 Bu/Acre with AgZyme[®] and showed increased pest resistance.

Application: The check was treated with 1 gallon of 6-24-6, 1 quart of corn mix and 200 lbs of Nitrogen. The AgZyme[®] treatment was the same as the check, but 12.8 ounces of AgZyme[®] was added to the starter and applied in furrow at planting.
